PBI Doors

Jean Goudreau
681, Melchers St.
Berthierville, QC J0K 1A0
CANADA

Subject: Letter attesting the absence of Added Urea Formaldehyde in PBI Doors' compliant products.

Mr. Goudreau,

After verification of your suppliers' information, **Vertima, a third-party certifier**, hereby confirms that there is no added urea formaldehyde (NAUF) in the composite wood panels provided by PBI Doors' suppliers and used in the manufacturing of PBI Doors' products analyzed by Vertima.

It is thus reasonable to say that PBI Doors' products, listed below, do not contain added urea formaldehyde.

List of analyzed products:

- Full Louver Door (all dimensions)
- Louver over Louver Door (all dimensions)
- Louver over Panel Door (all dimensions)
- Panel over Louver Door (all dimensions)

Please note that this attestation is made based on the information provided to Vertima by PBI Doors regarding its products and PBI Doors' suppliers data. Should there be any change of supplier after the issuance of this letter, the present letter loses its relevance.

Regards,

Aline Cobut, Ph. D
Special projects manager
